June 22, 2018

Mr. Kevin Fry,

Your 6/21/2018 request for the existing stop work order to be lifted is denied. The existing stop work order that was issued on 6/14/2018 expires at noon 6/22/2018 is extended until noon on 6/29/2018.

The stop work order prohibits all excavation work performed at the Kendal at Lexington construction site located within the City of Lexington except for the that work which is necessary to install the primary perimeter control measures called for in the approved erosion and sediment control plan for the SB West Basin. This includes all erosion and sediment control measures including top soil and seeding from the wet waterline up, temporary slope drains, temporary diversion dike, and temporary fill diversion as provided on the approved erosion and sediment control plans (see sheet C104A-IL). Your permit is in violation of section 178 of the Lexington City Code pertaining to violations and penalties for erosion and sediment control. The property must be brought back in compliance with the approved erosion and sediment control plans. If the property is not in compliance by noon on 6/29/2018, a stop work order will be issued for all construction activities.

Sincerely,

[Signature]

Noah A. Simon
City Manager
City of Lexington
